MONTHLY CALENDAR

for the Vegetable and Flower Garden.

Make the soil as rich as possible. Do not sow too deep—two or three times the thickness of the seed is the general rule. Keep seed-beds shaded and moist. Thin out timely and liberally. Transplant in wet or cloudy weather, and shade for a few days until the plants are thoroughly established. Keep the soil loose and fine by frequent workings, and

French Beans: Plant largely.	Mustard and Cress: Sow fortnightly.
Runner Beans: Plant largely.	Onion: Sow a few salad or green onions.
Beet: Sow largely.	Parsley: Sow a few in tins.
Borecole or Kale: Sow a medium crop.	Parasit: Continue sowing.
Broccoli: Sow largely.	Peas: Make a good sowing.
Brussels Sprouts: Sow a few.	Radish: Sow a few in a shady place.

Cucumber: Make a final small sowing.	Turnip: Sow largely.
Sweet Corn: Finish planting.	
Herbs: Sow in tins or seed-bed.	
Kohl Rabi: Sow largely.	
Leeks: Sow a few under shade.	

Plant out from seed-beds Cabbage, Cauliflower, Celery, Rhubarb, Tomatoes, etc. Stop Cucumber vines when setting fruit by pinching off the points of shoots. Plant Potatoes. Protect the seed-beds from the sun by using shade frames. Keep a good supply of water. See to it that the ground does not become caked, and hoe often.

Flowers.—This being generally a very hot month, it is advisable to sow seeds in a position sheltered from the sun and hot winds—or, better still, in tins or boxes placed under a canvas frame. On dull days the covering should be removed altogether. Most of the following will bloom during the winter and early spring months. Sow:—

*Alyssum	Cosmos	Marigold
Amaranthus	Delphinium	*Mignonette
Anemone	Dianthus (Pinks)	*Nasturtium
Antirrhinum	*Eschscholtzia	*Nigella
(Snapdragon)	Forget-me-not	Pansy

Canterbury Bells	*Lupins	Sweet William
Carnations	Marguerites	Verbena
*Clarkia	(Shasta Daisy)	Wallflower
*Climanthus Dampieri	Zinnias	
Cobaea		
*Cornflower		

Flowers marked (*) do not easily transplant, or, being very hardy, should be sown where plants are intended to remain. Thin out at an early stage; do not allow overcrowding. All other flower seeds can be sown in tins or shaded beds, pricked out into other tins, and finally transplant to the open ground during suitable weather.

For the greenhouse, make sowings of the following kinds: Begonia, Cineraria, Coleus, Cyclamen, Primula.

Kohl Rabi: Sow largely.
Lettuce: Continue sowing where to remain.

Plant out from seed-beds Cabbage, Cauliflower, Celery, Leeks, Tomatoes, etc. Plant Potatoes. Do not forget to protect the seed-beds by using canvas shades, and keep up a good supply of water. See to it that the ground does not become caked, and hoe frequently.

Flowers.—This is the first month of autumn, and although the weather during the day is usually hot, the nights are cooler, and any favourable conditions of temperature should be taken advantage of for making a full sowing of seeds of plants marked as seasonable. Make also good use of your canvas frames. Sow:—

All other flower seeds can be sown in tins or shaded beds, pricked out into other tins, and finally transplant to the open ground during suitable weather.

For the greenhouse, make sowings of Cineraria and Primula. If it rains, advantage must be taken to transplant any seedlings ready from previous sowings. Keep the surface of the soil well mulched.

Spinach: Sow largely.
Turnip: Sow largely.

Plant out from seed beds—Broccoli, Borecole, Cabbage, Cauliflower, Celery, Leeks, Parsley, etc.

FLOWERS.—The nights are now becoming colder, although the days may be warm, and all the seeds recommended should be sown as soon as possible, as they germinate much quicker when the soil is still warm, and give the seedlings a chance to make a bold display. Many of the seeds named can be sown out of doors, but any that are tender are better sown under the canvas shade, even now, as they are so much better under control. Sow:—

Lettuce: Sow for a succession.
Mustard and Cress: Sow fortnightly.
Plant out Borecole, Cabbage, Celery, Leeks, Onions, Parsley, etc. Cut the stems of Asparagus down to the surface as they decay. Top dress and manure with horse droppings.

Flowers.—This is the last month of autumn, and, if not already done, sowing should not be further delayed, as the cold weather, which will soon be upon us, will retard their growth. The canvas frame is now not only useful for shading purposes, but is also a protection against frosts; remove the cover entirely during the day when it is fine, replacing it at night. Sow:—

MAY

Broad Beans: Make a good sowing.

 Spinach: Sow a few.
 Divide and replant Herbs, Horse Radish, etc. Transplant Cabbage, Leeks, Onions, Parsley, etc. Dig, manure and trench your garden. Destroy all refuse from past crops.

Flowers.—Although we are entering the cold season, many of the hardier varieties may still be sown to keep up a succession of bloom. As early frost must be expected this month, it is advisable to sow in a glass or a canvas frame placed in a warm position. Very hardy and strong-growing plants can, however, be sown out of doors. JUNE

Broad Beans: Sow a medium crop.
 Lettuce: Sow a few under protection.
 Mustard and Cress: Continue sowing.

Radish: Sow a few in a sunny spot.
 Spinach: Sow a few in a warm situation.

Make sowings under protection. Plant out Herbs, Asparagus Roots, Horse Radish, Rhubarb Roots, Onions, Leeks, etc. Have a thorough clean up of your garden and dig and trench same.

FLOWERS.—As this is normally a very cold month and no warmth in the soil, only those possessing a glass house, a hot-bed, or a cold frame, should attempt to raise seeds, except the very hardiest sorts. The garden should be thoroughly manured and dug over for the coming season. Sow under protection:—

Antirrhinum

 Bellis Perennis
 (Double Daisy)
 *Calendula

*Candytuft
 *Cornflower
 Delphinium
 *Eschscholtzia

All other flower seeds can be sown in tins or shaded beds, pricked out into other tins, and finally transplant to the open ground during suitable weather.

Keep the seed-beds covered at night with straw matting or bags, or give some other protection.

JULY

Broad Beans: Sow a medium crop.
 Cabbage: Sow a few.
 Leeks: Sow a few under protection.
 Lettuce: Sow a few under protection.
 Mustard and Cress: Sow fortnightly.
 Parsley: Sow a few in tins.

 Spinach: Sow a few in a warm situation.
 Tomatoes: Sow a few in a frame.
 Turnip: Sow a few.

Protect your seed-beds by canvas shades. Plant out Rhubarb Roots, Horse Radish, Leeks, etc.

FLOWERS.—As the weather will not be favourable for sowing out of doors for another month, it will be advisable to do all preparatory work possible in the garden to receive new plants next month and later. The following may be sown if protection can be given:—

Antirrhinum
 (Snapdragon)
 *Candytuft
 Canna
 Canterbury Bells
 Carnation
 Delphinium
 Dianthus (Pinks)
 *Eschscholtzia

Cucumber: Make a small sowing in a frame for planting out early.

Endive: Sow a few.
Herbs: Sow largely all kinds under protection.

Kohl Rabi: Sow a few.

Make good use of your shade frames for raising all kinds of Vegetables and Salads which are inconvenient to transplant and cannot therefore be raised in tins or boxes. Plant Potatoes. Transplant Onions, Rhubarb, Leeks, etc.

Flowers.—This month ushers in the spring season, and the increasing warmth will greatly accelerate growth. If weather permits we advise a full sowing of all hardy annuals in open border, and more tender varieties in tins under protection. Sow:—

Flowers.—This is considered the best month to sow half-hardy annuals as frosts by this time are practically over. Thin out any seedlings which may have germinated too thickly. Mulch the surface of the soil with manure, which will greatly prolong the blooming season of annuals, as it will keep the soil cool and retain the moisture. Sow:—

FLOWERS.—Generally a hot and dry month, during which scarcely anything in the way of sowing can be done unless there is rain. Water freely if necessary. If not previously done, give the ground a good mulching. This retards evaporation from the soil, besides stimulating the plants and keeping the roots cool. Sow:—

Flowers marked (*) do not easily transplant, or, being very hardy, should be sown where plants are intended to remain. Thin out at an early stage; do not allow overcrowding. All other flower seeds can be sown in tins or shaded beds, pricked out into other tins, and finally transplant to the open ground during suitable weather.

For the greenhouse make sowings of Asparagus, Begonia, Cineraria, Coleus, Cyclamen, Ferns, Primula, etc. **Give plenty of shade to the seed-beds** by using shade frames, and water liberally in dry weather.
