SUMMARY : 34 685 = 14 047 HA

Number of farms : 84. Total area of farms : 512,281 acres.

Area irrigated : Flood : 664 acres. Overhead : 3,296 acres. Total : 3,960 acres.

Total area under crops and fruit : 35,067 acres. Area stumped : 1,795 acres.

Numbers of persons working on the land at 30.9.1969 :

Owners and occupiers :	Males	75;	Females	16;	Total	91
European, Asian and Coloured employees :	Males	32;	Females	-;	Total	32
African employees :	Males	3,837;	Females	613;	Total	4,450
Permanent and semi-permanent :	Males	932;	Females	1,436;	Total	2,368
Casual :	Males	4,769;	Females	2,049;	Total	6,818
Total :						

(i)

EXPLANATORY NOTES.

1969/70

Units of Measure :

(i) bags : the net weight of a bag is 200 lb. except in the following cases :

- (a) oats, barley, rice - 150 lb.
- (b) sunflower seed - 125 lb.
- (c) groundnuts (shelled) - 180 lb.

(ii) pockets :

- (a) seed maize, edible dry beans for seed - 100 lb.
- (b) seed potatoes - 75 lb.
- (c) ware potatoes - 37½ lb.

(iii) tons : the short ton is used - 2,000 lb.

Abbreviations :

- * - Estimated by Central Statistical Office.
- .. - Not applicable.
- ... - Not available.
- - Nil.
- n.e.s. - Not elsewhere specified.

Farm count :

This refers to farmers who planted a crop even in cases where it failed. Where the acreage planted is less than 1 acre, the production only is shown.

Irrigation :

Figures refer to both supplementary and total irrigation unless otherwise stated. Crops that were water planted, but not otherwise irrigated are excluded. Irrigation figures refer to areas actually irrigated.

Double Cropping :

Where a piece of land has been cropped more than once a year, the acreage has been included in this report once for every cropping during the year.

Maize :

Where seed maize is taken from a crop grown for grain, the acreage is shown as being planted for grain and only the production of seed maize is given under 'maize for seed'.

Wheat :

The winter crop has been estimated by the farmer in cases where he submitted his return before reaping.

Grain Crops, n.e.s. :

Rapoko, oats and munga are included in this section.

Coffee :

The crop refers to green beans i.e. clean beans which have been husked.

Cotton :

The crop shown is seed cotton i.e. the form in which the cotton is picked from the plant. Cotton lint is about one-third of the weight of seed cotton.

Sugar-cane :

The crop reaped refers to unprocessed sugar-cane. 8-10 tons of cane are required to produce 1 ton of raw sugar.

Tea :

The crop shown is made or black tea i.e. in the form in which it is consumed. Made tea is 19% by weight of green tea, the form in which the crop is reaped.

Industrial crops, n.e.s. :

This item includes pyrethrum, chicory, oil of geranium, pecan nuts, etc.

Potatoes :

The summer crop is planted between October and December, the first irrigated crop between January and April, the second irrigated crop between May and September. In cases where seed potatoes are reaped from a ware potato crop, the acreage is shown as being planted to 'ware potatoes' and the

of silage
acreage
included
