Published in
Registry,
TensiveExtending over
part of theIrrigation :

Figures refer to both supplementary and total irrigation unless otherwise stated. Crops that were water planted, but not otherwise irrigated are excluded. Irrigation figures refer to areas actually irrigated.

Double Cropping :

Where a piece of land has been cropped more than once a year, the area has been included in this report once for every cropping during the year.

Maize :

Where seed maize is taken from a crop grown for grain, the area is shown as being planted for grain and only the production of seed maize is given under 'maize for seed'.

Wheat :

The winter crop has been estimated by the farmer in cases where he submitted his return before reaping.

Grain Crops, n.e.s. :

Rapoko, oats and munga are included in this section.

Coffee :

The crop refers to green beans i.e. cloan beans which have been husked.

Cotton :

The crop shown is seed cotton i.e. the form in which the cotton is picked from the plant. Cotton lint is about one-third of the weight of seed cotton.

Sugar-cane :

The crop reaped refers to unprocessed sugar-cane. 8-10 tonnes of cane are required to produce 1 tonne of raw sugar.

Tea :

The crop shown is made or black tea i.e. in the form in which it is consumed. Made tea is 22% by weight of green tea, the form in which the crop is reaped.

Industrial Crops, n.e.s. :

This item includes pyrethrum, chicory, oil of geranium, pecan nuts, etc.

Potatoes :

The summer crop is planted between October and December, the first irrigated crop between January and April, the second irrigated crop between May and September. In cases where seed potatoes are reaped from a ware potato crop, the area is shown as being planted to 'ware potatoes' and the seed potato crop only is given under 'seed potatoes'.

Silage :

Where a crop is grown solely for silage, both the area concerned and production of silage are shown in this section. Where silage is obtained as a by-product of other production the area concerned is classified according to the main function, and only the production of silage is included in this section (see notes to farmer on specimen form).

Fruit :

The figures refer to commercial growers only.

Abbreviations :

- .. - Not applicable.
- ... - Not available.
- - Nil, or less than half a unit.
- n.e.s. - Not elsewhere specified.
