According to 6-days Herald Shamvat Panmure
has had 881 mm i.e. 34 inches - whole Valley

appears v. green & lucious - Much nut grass on
Ceres on lands which have been under irrigation
for winter crops now either in weeds or cotton.

On Ceres Mc Kenzie reported that they were growing
cotton after winter cereal. Had tried Soyas but
yields were poor 4-5 bags/Ac but he thought
the winter cereal responded to the previous soya
crop. Yields low '!' season too warm such
that crop makes rapid growth - I wonder
Apparently Ronny Pascoe has been growing Soyas
for some years with increasing success.

Mc Kenzie carried a revolver - reported recent kills on
on 'Lions Head'
